Reliance Digital Store IQ Contest

Farooq Adam · 28 October 2026

Summary

Build Reliance Digital Store IQ: the AI partner of the store associate, on one WhatsApp number. The associate uses it on the floor, with one hand, in front of a customer. Store IQ holds the facts. The associate owns the conversation.

- **Who can enter:** everyone at Fynd. One person for each entry. You can use any AI coding tools.
- **Dates:** the contest starts today, Wednesday 28 October. Submit by Friday 6 November, 18:00.
- **Prize:** an iPhone 18 Pro for the winner.

1. Why we build it

The team visited Reliance Digital, Croma and Vijay Sales stores in Mumbai as customers. Three facts set the task:

1. **Our best associates are the best in the market, but our median is weak.** Our best conversations scored 13 and 12 of 14. Our median was 6. The competitors scored 7 to 10.
2. **We start with the price.** Our associate spoke about the price first in 6 of 6 conversations. At the competitors, the customer asked first.
3. **Nobody asks about the home.** A median of 2 questions came before the first product.

Store IQ must make each associate do what our best associate does, with each customer.

2. What you build

One WhatsApp number that helps the associate do these steps, in this sequence:

Step	What Store IQ does
Before the shift	A short brief: today's stock, changed offers, one short video and one question
Assess	The associate sends a voice note. Store IQ builds a card of the customer's home and gives the next question to ask.
Validate	The customer says something partly correct. Store IQ gives a polite line that confirms, then corrects.
Translate	The associate sends a photo of a label. Store IQ gives a line to say for this home, for example: "8 kg: two pairs of jeans and two bedsheets in one wash."
Recommend and demonstrate	Three options with one reason each, and which difference to show the customer
Complete	The full solution and the full cost, charge by charge, for example the AC installation charges
Close	The offer opens only after the associate has assessed and demonstrated. Finance with its full cost in one sentence.
Follow through	A summary to the customer with consent, a task with an owner, and the installation job with the site needs
Review	A score for the steps, and one thing to try next time

Extra points: Hindi and one more Indian language, the department manager view, "Ask an expert", and a store visit log by voice note.

Rules for the floor: voice and photo first; the first reply in less than 5 seconds; not more than 3 lines and 3 buttons.

3. Rules

1. Build only with test data and a test WhatsApp number. No real customer data. No message to a real customer.
2. Prices, offers, stock and finance terms come only from the data. Store IQ never invents a discount or a specification.

© Reliance Retail 2026. For internal confidential use only.

3. Store IQ never guesses wealth from appearance. The associate sets the start level.
4. The associate decides. Store IQ recommends and gives the reason.
5. The work is the Intellectual Property of RRVL, Jio Platforms Limited and Fynd. Strict internal circulation only.

4. How we judge

Stage	What happens	Weight
Demo	Each entrant shows the TV scenario live on WhatsApp in 10 minutes. The judges select the top 3.	50%
Live test	New Reliance Digital associates serve the same customer scenarios without a tool, then with each top build. The judges score each conversation from 0 to 14.	50%

In the demo, the judges look at: works end to end on WhatsApp (25), the steps of section 2 and a reason in each answer (25), fit for the floor (20), correct and safe (20), extra points (10).

5. Dates

Date	What happens
Wednesday 28 October	The contest starts.
Friday 30 October	Ashish Chandorkar shares the sample data pack and the test access.
Friday 6 November, 18:00	Last time to submit
Monday 9 November	Demos and the top 3
After the Diwali week (date to be confirmed)	Live test in a store, and the winner

6. How to submit

Reply in the Slack thread with "In" to enter. Before Friday 6 November, 18:00, send:

1. The test WhatsApp number of your build
2. The link to your code
3. A demo video of not more than 5 minutes
4. A one-page note on your design
